+ PROFESSIONAL SKILLS

	good	average	skilled
Adobe Photoshop			
InDesign			
CSS/HTML			
PHP			
Javascript/Jquery			
AJAX			
Codeigniter			
SEO			
Wordpress			
Joomla			
Windows			
Linux OS			
MYSQL & Oracle			

+ EXPERIENCES

- 2005 **C++**
Started learning software programming.
C++ as the first language I learnt.
- 2007 **Content Management System**
Started learning the web element.
First CMS that I explored is Joomla.
- 2008 **Web Programming & Design**
Started learning web programming language (HTML, CSS, PHP, Javascript, Ajax, etc.)
Started learning website design by using Adobe Photoshop.
- 2010 - Now **Freelance & Web projects**
Doing freelance in web development.
Started own web projects like
-gtcexpert
-inuevents

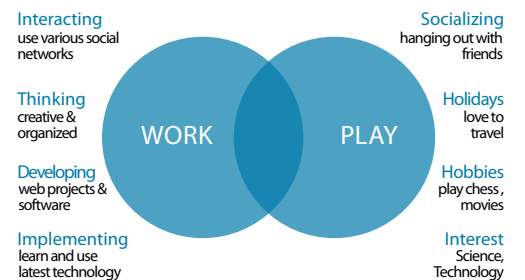

+ EDUCATION

- 2002 - 2003 Sekolah Kebangsaan Jalan Menteri, Selama
- 2007 - 2008 Sekolah Berasrama Penuh Integrasi Gopeng
- 2009 - 2010 **Mechanical Engineering - Foundation Study**
Petronas Technology of University
- 2010 - Now **Information Communication Technology - B.A**
Petronas Technology of University

+ PERSONAL SKILLS

- Independent
- Highly motivated
- Always looking for challenges
- Team player
- Creative

+ WORK/PLAY BALANCE

RIZAL YUSOFF

ABOUT ME

+ PERSONAL LIFE

I was born in January 17, 1991 in Malaysia. So, back since I was a small kid, my family and I have moved to several different places in this country. I ever lived in ijok, selama and also parit buntar which all of them appear to be in the state of Perak. Now, since both of my brother and sister are working in Kuala Lumpur, my family and I now harmonically living there. As the last child in my family, I have being influenced mostly by my brother and sister in many things that I have done. As for example, although back there when I was small, I always wanted to become a doctor, but seeing my brother has moving his steps into the IT world, has then made me wanted to become just like him.

Being raised in the village environment at my early age, has made me understand many valuable lessons in life. It has thought me how to be persistent, independent and believe in my own self. Being able to see the difficulty of life back when I was a kid, made me always be thoughtful to what my future would like to be. Thus, in each level that I have stepped on in this life, I always try to grab the chances and work as hard as I could to getting the best result of whatever I am doing. As for that, I have done pretty well when I was in school. I managed to get 5A's for my UPSR, 8A's for my PMR and 9A's for my SPM. And for those excellent results that I have achieved, I finally got an offer to further my studies in Universiti Teknologi Petronas, Malaysia. Right now, I am in my 2nd year of my study in Information Communication and Technology course, and will expectedly be graduated in the early of 2014. For me myself, I really love this university, and also the peoples around it. Everyday I live and study here, I always feel excited to meet new peoples to share ideas and experiences. Because I believe, being a university student is really wonderful where someone could easily creating changes to whatever the things they love. For example, while studying right here, I mostly spend my time doing freelance jobs, and also several projects of my own.

Just like everybody else, I also have my own favourite game which is chess. For me chess is pretty much like the real life. There will be a point where you will face some problems, and another point where you found the solution to overcome those problems. I also love to play badminton, listening to music and watching movies during my free times.

+ LIFE AS PROGRAMMER / WEB DEVELOPER

Starting in year 2000, at nine years old, I was tinkering with the family of computer, figuring out how to install/uninstall programs, surf the internet, burn discs, etc. As time progressed I did urge my self to find out how computers operated. But learning computer at that time was quite tough for me, because there was no computer yet at my home. When I got my first computer back in the year of 2002, I was started became a member of a few online communities and technology related forums. After observing other users create incredible applications and manage massive networks, I decided my next step in gaining technical knowledge was to learn how to script. Began with C++, I then started to move on to the other complex language like java, php, mysql, javascripts etc. All of which have been self taught. As time progressed, I've put my interest more on the websites technologies. Thus I began my move to dive more on the web based languages. Today, I already made a web development as a major skills of mine and already sharing my services to the peoples. As web developer/designer and technology enthusiast, I am really interested to meet a lot of peoples dealing with the stuffs same like I am to share ideas and experiences.

RIZAL YUSOFF

EDUCATION

UPSR : 5A's || PMR : 8A's || SPM : 9A's || CURRENT CGPA : 3.13

+ EDUCATION HISTORY

- 1998 - 2002 SK Sultan Idris II , Felda Ijok
- 2002 - 2003 SK Jln Menteri, Selama
- 2004 - 2005 SMK Anderson, Ipoh
- 2005 - 2006 SMK Seri Perak, Parit Buntar
- 2007 - 2008 SBPI Gopeng, Perak
- 2009 - Now Universiti Teknologi Petronas

+ COURSES I AM CURRENTLY TAKING

SEMESTER 5			
Code	Course	Cr	S
TBB 2063	Network Security	3	M
TBB 2073	IT Project Management	3	M
TBB 2083	Wireless Technology	3	M
GBB 3063	International Business	3	Em
CBB 2012	Health, Safety & Environment	2	CT
Credit Hours		15	

+ COURSES TAKEN

SEMESTER 1			
Code	Course	Cr	S
LBB 1042	Academic Writing	2	CT
TBB 1043	Computer Organisation	3	CT
GBB 2013	Business Statistics	3	CT
TBB 1013	Structured Programming	3	CT
EBB 1133	Discrete Mathematics	3	M
PAB 1042	Introduction to Oil & Gas Industry	2	U
Kxx xxx1	Co- Curriculum I	1	U
Credit Hours		17	

SEMESTER 2			
Code	Course	Cr	S
TBB 1023	Database Systems	3	CT
TBB 1033	Internet Programming	3	CT

ACHIEVEMENTS & PARTICIPATIONS

+ 1 MALAYSIA PAPER PLANE FUN CONTEST 2010

This is the National level competition which being held at Dewan Pusat Sukan Universiti Putra Malaysia on 7th March of 2010. Although the name of the competition is stated as "Fun Contest", my teammates and I were doing our best to win that competition. In this competition my teammates and I were urged to use our creativity to the fullest. It also taught me how to generate my critical thinking at the very critical moment as I need to think at my very best on how to create the best plane to get the highest mark for our team.

+ NGC 2010 MONTAGE COMPETITION

This is the montage competition for National Green Convention 2010 that was being held at my university. Each one that joined this competition needed to come out with a video that relates with our world's environment nowadays, and also helps to promote green environment. This helps me to enhance my creativity as well as sharpen my video editing a little bit more. Although I did not win this, I am glad that I joined this competition as it made me more aware about our world.

+ RESIDENTIAL COLLEGE INNOVATION EXHIBITION 2011

This is one of the very interesting events that I ever joined. The rule for this competition is that every team must come out with a new idea and complete documentation on how to improve the residential college management for my university. My teammates and I came out with the idea that the residential management team should use social media like Twitter to increase the efficiency of communication between the management team and the student. Our idea turned out to be one of the best ideas during that competition.

PORTFOLIO

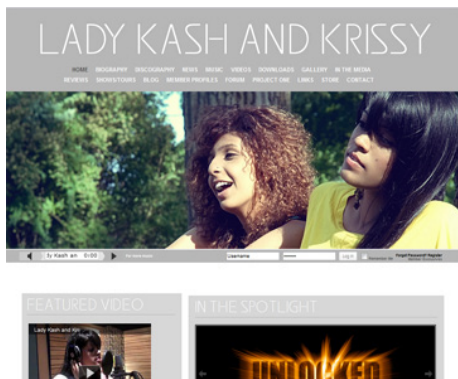

visit <http://www.rizalyusoff.com/portfolio> for more

+ INUEVENTS

Inuevents is the second project of my own that i have developed. This site is developed by using Codeigniter framework. The idea of this project is for events promotion site which can be used by students of Universiti Teknologi Petronas. This project is registered under the domain name of inuevents.com, and was a quite a big hit when this site being launched for its first time before. There is about 243 fans on facebook for this site, and about 88 peoples following it on twitter. However since there was some trouble about the maintainence, the first version of this project was taken down, but its prototype still can be seen through this url : <http://inuevents.rizalyusoff.com>

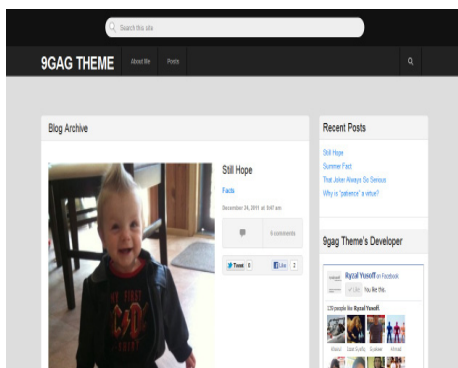

+ LADYKASH AND KRISSY

This is the first big project that I ever got to develop. Lady Kash and Krissy are the duo singer from Singapore and my job is to develop the official site for them. I developed this project by using wordpress CMS platform. This project has thought me how to organize a big project, how to deal professionally with peoples, and also thought me to be a team player as well as being independent at the same time.

This site could be access through this following address :
<http://www.ladykashandkrissy.com>

+ 9GAG WORDPRESS THEME

9gag theme is the first wordpress theme or template that I ever made. The reason behind this theme development is because I feel that somehow, I need to contribute something to the community. Thus, as I have seen many of the peoples out there keep asking and finding this kind of theme which is similar to the 9gag.com site, I then thought why not I contribute some of my skills for the sake of the community. This theme receives a great respond from peoples which the total number of download for this theme now has reached about 440 and still counting. The demo of this theme could be seen on :
<http://9gag.rizalyusoff.com>
